

Resolving the Three Great Mysteries: Consciousness, free will, and God

by Sperry Andrews, ASCSI Conference Proceedings
'Aspects of Consciousness', Raleigh, NC, Oct. 2018

Introduction: Bernhard Riemann's original conception of curved spatial surfaces offers an n-dimensional space embedded in an n+1 dimensional manifold. When $n = 0$, a non-dimensional (0D) point functions as an invariant absence. This 0D point is kept from collapsing back into the Void by a (virtual) vortex of equal and opposite torsional potentials, initiating the emergence of curved spatial surfaces. ([click for published paper](#))

Torsional potentials 'drive' the rapid replication of discrete 0D coordinate locations to form an expanding 3D volume. All 0D points in 3D also remain united at a single 0D polar point in the fourth dimension of space (4D) that most physicists think of as a point in time. Hereafter, 0D points are embedded in all higher-dimensional Riemannian spaces forming nested hierarchies which include and transcend all lower dimensions. Each higher polar point serves as an observer-driven mechanism, measuring and manifesting gradations of self-organizing electromagnetic and gravitational potentials.

All 0D points also sustain their 'non-material' absence—in space over time—as the indivisible presence of a primordial (Godlike) awareness which we can consciously experience as an 'insightful witnessing all-knowing mirror-like intelligence.' As a dimensionless Void must retain its formless nature, all that 'takes form' must be constructed out of 0D points, maintaining their formless unity in ever more complex ways.

The absence of form—without need of any force or intention—continuously 'orchestrates' the extension and expansion of form. We also experience primal 0D awareness (throughout 3D) as the basis for our self-centric (subjective) experience. 4D functions as the next-higher level of observer-driven (objective) consciousness.

Our experience of free will is the effect of 0D/4D observer-driven consciousness on 3D geometry, biology, and psychology. The manipulation of things, thoughts, and activities in 3D requires 4D self-consciousness.

If stressful, this is experienced as pain and suffering (psychophysiological tension). What we attend to and how well we pay attention, therefore, has consequences. 4D consciousness of 3D awareness allows us to learn ways of directing our attention. 'Free will' is thereby utilized in ever more meaningful ways.

With each higher dimension, there are more 0D points influencing our overall comprehension and articulation of lower dimensions. Freedom from suffering occurs (i.e., Self-realization) when 0D/3D/4D (and up) are aligned together, as a resonant synergy. This requires 4D objective consciousness to 'effortlessly align with and sensitively embody' a subjective 0D/3D 'awakeness' which has no image. Like a mirror, it unites, reflects, and transforms our experience of who and what we are, a universal intelligence appearing as uniquely individuating minds and bodies.

By consciously sharing awareness-of-this-awakeness, the delusions of separation dissolve, awakening and enlightening our selves and all of humankind. It is truly astounding that all this has been spontaneously orchestrated. Our unborn immortal nature (as a void-based whole) has evolved unique indivisible beings, and all life everywhere, adding 'us' to the future of a virtually fathomless multiverse while flawlessly clearing 'a way' for our awakening as a newly enlightened species.

"The day science begins to study non-physical phenomena, it will make more progress in one decade than in all the previous centuries of its existence." - Nikola Tesla
